The Russian NovaWind will urgently install 200 MWp of photovoltaic solar energy in Mali. As the electricity crisis continues to slow the development of Mali's economy, transitional president Assimi Goita laid the foundation stone for a new solar photovoltaic power plant on Friday, May 24. With a capacity of 200 MWp, the plant is being built ...

Q: I want to purchase product to install a solar PV system on my home. Do I still need to become an AEE Solar Dealer? A: Since AEE Solar is a wholesale distributor, we distribute product to licensed businesses and contractors. We would be happy to refer you to a local reseller who could meet your product needs.

Abu Dhabi-based renewables major Masdar has signed an agreement with Yemen's Ministry of Energy and Electricity to build a 120-MW solar park in Aden which serves as a temporary capital of the war-torn Arab country.

AEE Solar's very own Brad Bassett remembers purchasing 30W modules in 1979 for the staggering price of \$380 each! That works out to over \$12 per watt, about 20 times what solar modules cost today. That's a big price drop for only 40 years and we can only imagine what prices will look like in another 40 years.

The Amea Power Group has been awarded the contract for the construction and operation (for 25 years) of a 50 MW photovoltaic solar power plant in Mali. The plant will supply the populations of the Koulikoro region

with ...

**Brief Project Description** The project involves development, finance, EPC, operation and maintenance of a 20MW solar power plant to supply electricity to commercial customer. Location: Mali Technical: 20MW ground mounted (tracker) solar panels, string inverters, transformer and switchgear, monitoring, weather station, fence and other balance of system equipment. Year: ...

The project created financing windows for high-quality, small-scale solar solutions, and provided partial subsidies to beneficiaries to make these systems affordable for them. The project also engaged solar suppliers and installers to provide grant-financed solar energy systems to critical service facilities in the same geographical areas.
