

How much energy will Algeria produce by 2035?

Algeria aims to reach 15,000 megawatts(MW) of electricity generation capacity based on renewable resources by 2035,with a growth rate of 1000 MW/year. Furthermore,around 1000 MW of off-grid renewable energy installations are expected to be put on stream by 2030. A new law on energy transition is being prepared.

What is Algeria's Energy Transition Strategy?

One of the most ambitious elements of Algeria's energy transition strategy is the development of the SouthH2 Corridor,aimed at supplying Europe with green hydrogen.

Is Algeria a key natural gas supplier to Europe?

Unauthorized access or electronic forwarding,even for internal use,is prohibited. Algeria,long renowned for its abundant hydrocarbon resources,is now navigating a dual path: sustaining its role as a key natural gas supplier to Europewhile rapidly accelerating its energy transition ambitions.

Is Algeria ready for low-carbon energy?

The recent MOU signed between Sonatrach, Sonelgaz and a consortium of European partners, including VNG, Snam, Seacorridor and Verbund Green Hydrogen, underlines Algeria's commitment to tapping into the global demand for low-carbon energy.

How can Algeria improve regulatory efficiency?

Finally,improving regulatory efficiency by streamlining approval processes and reducing bureaucratic delayswill foster a more favorable environment for investors,accelerating project timelines and enhancing Algeria's competitiveness in the global energy market. Algeria's future is bright,but the road ahead is complex.

What is Algeria's solar potential?

Because of its location in the Sahara Desert,Algeria's solar potential is huge,estimated to be as high as 14 TWh per year. Algeria's Sonatrach and Eni,the Italian oil and gas company,jointly built a 10 MW solar plant in 2017.

Over the last 5 years, how has the energy mix changed, and what have been the key drivers? In 2018, Algeria"s energy mix was composed of 1% liquid petroleum gas (LPG), 20% oil products and 79% gas. 1 Experts believe that the country will reach "peak oil" between 2035 and 2040. Concerning the legal framework, law No. 02-01 of February 5, 2002, relating to electricity and ...
