

What is AllCell Technologies?

AllCell Technologies is a leader in high performance energy storage solutions. It specializes in electric vehicles, micro mobility, aviation, robotics, stationary storage, and maritime applications. AllCell's proprietary and patented passive thermal management and modular platform are used in their energy storage solutions. [Read More](#)

Where is allcell based?

The AllCell team and manufacturing facility will remain in Broadview, Illinois. The Beam and AllCell teams intend to integrate rapidly and explore an expansion of battery manufacturing in California where there are significant government incentives to do so.

How will the acquisition of allcell impact Beam Global?

Management expects the acquisition of AllCell to impact Beam Global by: AllCell's highly flexible battery platform architecture, used in Beam's products for ten years, is ideally suited for applications where energy density, safety and bespoke enclosures require high power in small spaces.

Who makes allcell batteries?

The AllCell team brings to Beamworld-renowned Chief Battery Scientist Said Al-Hallaj as well as deep engineering and manufacturing experience from Argonne National Laboratory, Ford Motor Company, Stellantis, Johnson Controls, AVL Powertrain and the Illinois Institute of Technology.

Who are Beam Global & allcell?

Beam Global and AllCell have, separately, provided charging and high-powered energy storage solutions to micro-mobility, land based EVs, aviation, maritime and recreational customers as well as stationary and energy-security platforms, for both government and Fortune 100 companies.

Will Beam Global's acquisition of allcell reduce cogs?

Energy storage is crucial to Beam Global's value proposition and battery systems currently account for approximately 30% of Beam Global products' bills of materials. The strategic acquisition of AllCell will significantly reduce COGS through margin recapture and value engineering.
