

Is Angola redefining its energy sector?

Currently, 92 percent of our workforce is Angolan," explains Bond. Like elsewhere in the world, the energy sector in Angola is also evolving to include more renewables and to reduce its carbon footprint. Angola's largest oil company Somoil, now 20 years old, is redefining itself. "There's clearly a shift to renewables. One is solar, solar exposure.

Who are the biggest energy companies in Angola?

International giants like TotalEnergies and ExxonMobil have been in Angola for decades, welcoming Angola's stable government with streamlined regulatory and tax policies. Along with the national producer Somoil, they are also developing renewable energies and cutting the carbon footprint of their petroleum production.

How can Angola contribute to a fair energy transition?

Together with Angola we are taking steps towards a fair energy transition. We contribute to guaranteeing the security of energy supplies and we share resources and technologies with the country. We leave the people with a good part of the energy we produce together, thus expanding the access to energy.

Is Angola an energy superpower?

Southern Africa's second-largest oil and gas producer, Angola aims to be an energy superpower with an array of renewables including solar, wind and hydropower. International giants like TotalEnergies and ExxonMobil have been in Angola for decades, welcoming Angola's stable government with streamlined regulatory and tax policies.

Will Angola become the largest oil producer in southern Africa?

The International Energy Agency says Angola is set to become the largest crude oil producer in Southern Africa, with a foundation for renewable energy, through investments and supportive measures. TotalEnergies is the largest oil and gas producer in Angola, where the government is encouraging more investment to expand that production.

Is there solar power in Angola?

Plenty of rivers in Angola," says Somoil CEO, Edson dos Santos. Total's Olivier Jouny also says the firm is aiming at a range of renewable power sources in Angola. "Here in Angola, we see in particular a very strong potential for solar power. We currently have a solar project in the town of Lubango, in Huila province, in the south of Angola.

Angola will achieve more than 70% of installed renewable capacity - one of the highest percentages in the world - which includes 800 MW of new renewables (biomass, solar, wind and mini-hydro). Angola will thus be on a level playing ...
