

Huge battery storage plants could soon become a familiar sight across the UK, with hundreds of applications currently lodged with councils. In one corner of West Yorkshire locals are fighting ...

Battery storage facilities for renewable energy in the UK. During 2022, the percentage of renewable generation in the UK energy mix rose to 41.4% compared to 39.6% in the year prior. The UK government has set a target ...

The energy storage division of New HORIZONS Ahead (NHOA), which also has business lines for e-mobility and electric vehicle (EV) fast charging infrastructure, recorded a 384% growth in online BESS capacity at the end of Q3 2022 to the end of Q3 2023, as reported by Energy-Storage.news. In an announcement made today (19 February), Eku Energy said it ...

The UK's energy regulator, Ofgem, is set to design and deliver the first round of a cap-and-floor mechanism for LDES technology. Following a consultation period held at the start of the year, Ofgem will implement the ...

Battery storage startup Field has secured a pipeline of 160MW of battery storage sites in the UK, and begun construction of its first 20MW site in Oldham, England. The company - originally called Virmati Energy - was ...

The UK's largest battery energy storage system has gone live in North Yorkshire. Lakeside Energy Park is a 100MW facility in Drax, near Selby, which can provide power to about 30,000 homes a day ...

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.

Andrew Philpott, the company's chief development officer, said: "At 100MW capacity, our new development at Tealing will be one of the largest battery energy storage schemes operating in the UK ...

Indeed, the UK's energy storage pipeline increased substantially by 34.5GW in 2022. By the end of the year, 2.4GW/2.6GWh of battery storage sites have now been connected in total. This article discusses the significant growth of the energy storage pipeline in the past year and what to expect in the coming years. Energy storage deployment rates

Energy-Storage.news" publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 21-22 February 2024. This year it is moving to a larger venue, bringing together Europe's leading investors,

policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.

The UK should not lose out on an opportunity to become a leader in utility-scale BESS (pictured), argues Nick Bradford of Atlantic Green. The UK Battery Strategy is intended as a roadmap to establishing a competitive value chain. As such, it has been welcomed, but falls short in recognising the potential for the battery energy storage system (BESS) sector to make ...

The UK's first DC-coupled battery energy storage system is under development in a collaboration between GE Renewable Energy and engineering company Wykes. GE Renewable Energy was chosen by Wykes to deliver the 25MW multiple hour duration energy storage systems, which will be integrated with Wykes' 60MW solar PV plant at the Chelveston ...

Energy trading starting to make up for UK ancillary service saturation . As Energy-Storage.news has previously written, revenues for UK battery storage projects have crashed year-on-year in 2023 after higher-than-expected performance in 2022 as the saturation of ancillary service markets like FFR (Firm Frequency Response) started to have an impact.

Although COVID-19 lockdowns suppressed volatility, investors could still have achieved their required IRR for a battery storage asset during 2020. Credit: wikimedia user kwh1050. Energy-Storage.news" publisher Solar Media will be hosting the Energy Storage Summit 2021 in an exciting new format on 23-24 February and again on 3-4 March.

Field primarily operates in the UK where it has a 20MWh battery energy storage system (BESS) project online in Oldham, northern England, and several more under construction across the country. It is also targeting Spain, Germany and Italy, where country head Emanuele Taibi talked to Energy-Storage.news for a special feature on the Italian ...

Other technologies, such as liquid air energy storage, compressed air energy storage and flow batteries, could also benefit from the scheme. Studies suggest that deploying 20GW of LDES could save the electricity system £24bn between 2025 and 2050, potentially reducing household energy bills as reliance on costly natural gas decreases.
