

What makes Northvolt a good battery manufacturer?

Cell technology. For land, air and sea. A battery cell manufacturer at heart, we're working with three kinds of chemistry -- enabling us to deliver battery solutions for virtually every corner of electrification. A foundation to Northvolt's low-carbon footprint comes from a commitment to power battery manufacturing with 100% fossil-free energy.

Will Northvolt be restructured?

Northvolt, the company's flagship battery gigafactory in Skellefteå; in north Sweden, will remain operational, the business said. It added that the restructuring process will ultimately help Northvolt's long-term mission to create a Western industrial base for battery production.

Will Northvolt reduce reliance on Chinese rivals?

Europe has been hoping that Northvolt would reduce Western car makers' reliance on Chinese rivals such as battery maker CATL (300750.SZ) and EV and battery maker BYD (002594.SZ). Northvolt said the \$100 million in a new loan is part of \$245 million in financing support for the bankruptcy.

Is Northvolt a homegrown EV battery champion?

A partner of major European automakers, Northvolt produces lithium-ion batteries for the blooming electric vehicle industry, which has recently been rocked by intensifying competition from the likes of China. The Stockholm-based business has long been regarded as Europe's best hope of building a homegrown EV battery champion.

Why did Northvolt take a decisive step?

"This decisive step will allow Northvolt to continue its mission to establish a homegrown, European industrial base for battery production," Tom Johnstone, interim chairman of Northvolt's board, said in a statement, noting the support Northvolt has received from existing lenders and customers.

Does Germany's Porsche have a relationship with Northvolt?

Germany's Porsche has never confirmed its relationship with Northvolt, but a person familiar with the agreement between the two companies said the Swedish start-up was contracted to make the batteries for the all-electric Porsche 718, scheduled for launch next year.

The NorthFlex project is mainly attributed to Northvolt's Greenfield factory project in Gdansk, Poland, which is also the Europe's largest factory for energy storage solutions. This factory reflects Northvolt's ambition to become a global leader in the development and delivery of premium, sustainable battery solutions for the European market.

Traditional battery equipment manufacturers are not experts in building machine learning solutions. While both battery R& D and manufacturing are data heavy -- a characteristic that lends itself to machine learning -- the industry has barely scratched the surface of what the integration of machine learning solutions could mean for its activities.

Harald Mix is a Co-Founder of Northvolt and shareholder, Co-Founder and Chairman of Stegra (previously known as H2 Green Steel) and Chairman of Vargas Group. The following article has been translated to English and abridged, following original publication as an OpEd in Dagens Industri, October 15, 2024.

Battery-grade nickel-manganese-cobalt (NMC) blend recovered by Northvolt through the recycling of battery materials. The Revolt process explained Northvolt's battery recycling process involves several steps, all of

which play a role in ensuring the safe and effective processing of materials.

Some in that camp still praise Carlsson and Northvolt for establishing Europe's EV battery ambitions, even if Northvolt is not the one that goes on to lead the charge. Henry Sanderson, executive editor at battery materials research publisher Benchmark Mineral Intelligence, called the news a "setback for Europe's ambitions to build a ...

Maybe, from our perspective, one of the most significant impacts. At Northvolt Labs, we will establish a team of experts with Northvolt to work together on the development and commercialization of battery cells optimized to power commercial heavy-duty vehicles. Working with Northvolt is one of the different pieces in the jigsaw puzzle of the ...
