Introducing Australia's first absolute 0°C ice bath chiller unit that creates real ice! This innovative chiller can also heat water up to 42°C, offering precise temperature control for optimal recovery and relaxation. Easily switch between ice-cold and warm temperatures to enhance your recovery experience using the control panel or a convenient phone app.

To produce 10lbs of ice per day at home, you'll need 2 solar panels of 100W. A solar ice commercial production (for a restaurant/bar/hotel) of 250lbs/day requires 6 solar panels of 500W each. An industrial ice machine that produces 2200lbs of ice a day requires 25 solar panels of 500W each. Let's see how we get to these figures:
