The solar controller starts your generator allows it to power the house and recharge the battery to 100% and then turns off the generator. For the sun power system, I've read in the manufacturer documentation that it checks to make sure the solar is not able to produce enough electricity for the house and recharge the batteries.

A solar powered whole home generator sizing between 2000 and 3000 watts is generally adequate to meet the essential needs of a typical family, powering lights, small appliances, electronics, and a refrigerator during power outages or off-grid scenarios. ... Traditional Standby Generators: - Environmental Impact: Typically run on fossil fuels ...

But the benefits don't stop there--solar-powered generators are also easier to start, quieter, lower maintenance, and, of course, kinder to the environment. Our favorite solar generator for emergency backup power is the EcoFlow Delta Pro. It combines a fast solar charge time with a generous 3.6 kWh capacity, can directly power your home's ...

An average standby generator that can power your home costs between \$6,000 and \$11,000 with installation costs inclusive. Minus installation costs, a standby generator costs \$3,000 to \$6,000. Since an average American household uses 20kW to ...
