

Does BASF have a NaS battery?

BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery) *1.

What is BASF NAS model L24?

BASF will begin deliveries of NAS model L24 in the second half of 2024. The new product has been jointly developed by NGK Insulators, a Japanese ceramic manufacturer, and BASF Stationary Energy Storage. The new model has a low degradation rate of less than 1% per year due to a reduced corrosion in battery cells.

Who is NGK & BASF?

BASF has partnered with NGK to develop and market the NAS technology since 2019, marking the German chemicals company's first entry into the energy storage market and closely followed by the formation of its BASF Stationary Energy Storage subsidiary.

Are BASF and NGK working together?

BASF and NGK have worked together since 2019. NGK has been deploying NaS battery units for over 20 years, mostly in Japan. In the early 2010s General Electric invested some \$200 million in making a molten salt battery branded as Durathon. Its then CEO Jeff Immelt believed that it would become a billion dollar business.

Did BASF conduct a safety audit?

On behalf of BASF, TÜV Rheinland conducted a safety audit. Please find the summary here. All materials used in NAS batteries manufactured by NGK Insulators, Ltd. are abundant on earth. When used in combination with a fast Power Conversion System (PCS), NAS batteries can respond within milliseconds.

BASF New Business GmbH (BNB) has successfully started up a system comprising four NAS battery containers, which have been integrated into the electricity grid at BASF's Verbund site in Antwerp, Belgium. With this long-term project in Antwerp, the BASF team wants to test various operating scenarios and further explore the potential of NAS batteries. NAS batteries are ...

Development of sales pipeline of energy storage in the region and manage from contact to execution of the battery projects. Main Responsibilities & Key Activities: Take responsibility for financial performance to achieve agreed targets regarding ...

BASF New Business GmbH (BNB) has successfully started up a system comprising four NAS battery containers, which have been integrated into the electricity grid at BASF's Verbund site in Antwerp, Belgium. With this long-term project in Antwerp, the BASF team wants to test various operating scenarios and further

explore the potential of NAS batteries. ...

Nagoya, Japan and Ludwigshafen, Germany, June 11, 2019 - BASF New Business GmbH (BNB), a wholly-owned subsidiary of the German chemical group BASF, and Japanese ceramics manufacturer NGK INSULATORS, LTD. (NGK) today announced the conclusion of a sales partnership agreement (SPA). The agreement gives BNB non-exclusive ...

Ludwigshafen, Germany, and Nagoya, Japan, June 10th, 2024 - BASF Stationary Energy Storage GmbH, a wholly owned subsidiary of BASF, and NGK INSULATORS, LTD. (NGK), a Japanese ceramics manufacturer, have released an advanced container-type NAS battery (sodium-sulfur battery).

Antwerp, Belgium, and Ludwigshafen, Germany - BASF New Business GmbH (BNB) has successfully started up a system comprising four NAS battery containers, which have been integrated into the electricity grid at BASF's Verbund site in Antwerp, Belgium. With this long-term project in Antwerp, the BASF team wants to test various operating scenarios and ...

BASF SE's BASFY subsidiary BASF Stationary Energy Storage GmbH and NGK Insulators, Ltd., a Japan-based ceramics maker, have introduced an advanced container-type sodium-sulfur battery (NAS battery).

The solutions range from 0.5 to 20 MW and, thanks to the combination of the advantages of NAS batteries and Convert SC Flex converters, are particularly suitable for behind-the-meter battery storage systems, where the seamless transition between grid-parallel and off-grid operation offers a unique benefit. A complete battery energy storage ...

New product NAS MODEL L24 is characterized by significantly reduced degradation rate; Improved technology allows customers to save approx. 20% on their investment in NAS battery storage system compared to the ...

NGK's NAS battery is the world's first commercialized megawatt-class battery which has the capacity to store large amounts of electricity for hours. The NAS battery system provides an array of superior features, including larger capacity, higher energy density and longer life compared to other battery technologies. These features are ...

BASF's chemical expertise and our know-how in the design and production of battery modules and systems complement each other perfectly here," adds Tatsumi Ichioka, General Manager of the NAS battery division at NGK. NGK's NAS battery is the world's first commercialized megawatt-class battery which has the capacity to store large ...

NAS batteries, which has maximum 1,000kW-dc power and 5,800kWh-dc dischargeable energy and consists of four sets of containerized NAS batteries, were ordered by BASF New Business GmbH ("BNB"), a

wholly-owned subsidiary of German chemical group BASF. The NAS batteries has been connected to the electricity grid at BASF's Verbund site in ...

The new product NAS MODEL L24 has been jointly developed by NGK and BASF and is characterised by a significantly lower degradation rate of less than 1 percent per year thanks to a reduced corrosion in battery cells.

The new "advanced" version of the sodium-sulfur (NAS) battery, first commercialised by Japanese industrial ceramics company NGK more than 20 years ago, offers a 20% lower cost of ownership compared to previous ...

The NAS battery, manufactured by NGK Insulators Ltd. in Japan and distributed globally by BASF Stationary Energy Storage GmbH, is made up of molten sodium and sulfur electrodes as the basis of its technology. This offers six or more hours of continuous battery discharge, which can support 24/7 carbon neutral operations for large commercial ...

Since then, Energy-Storage.news has reported on various projects announced by both NGK and BASF, including a 3.6MWh NAS battery for Mongolia's first solar-plus-storage project, a 950kW / 5.8MWh system at a BASF production facility in Antwerp, Belgium, and various deployments in Japan and South Korea.
