

What is the best solar battery in Kenya?

The best solar battery in Kenya is definitely a deep cycle battery. Deep cycle solar batteries can be categorized into two; lithium ion batteries and lead acid deep cycle batteries. Lead acid batteries have been around for a really long time. They are the batteries used in cars. Deep cycle lead batteries are specifically used in solar systems.

Are solar battery prices in Kenya worth it?

Solar batteries prices in Kenya is a major consideration for many people when looking to invest in a solar battery. Low prices are attractive for many, but if the low price comes at the expense of battery life and quality then it is not worth it.

Are lithium ion batteries better than lead acid batteries in Kenya?

However, the price of these solar batteries in Kenya is higher than that of lead acid batteries. But, lithium ion batteries have a longer life span, are maintenance free, and have a bigger discharge depth than lead acid batteries. You harvest more energy from lithium ion batteries than from lead acid batteries.

How does deep cycle technology affect solar battery prices in Kenya?

Deep cycle technology allows a solar battery to be discharged slowly over a long period of time until it has nothing left to give and then recharge and be ready for use again. The deep cycle technology affects not only performance of the solar batteries but also the solar battery prices in Kenya.

Are deep cycle lead acid solar batteries cheaper in Kenya?

Deep cycle lead acid solar batteries for sale in Kenya cost more than the car lead acid batteries do. However, they are more affordable than solar lithium ion batteries. The lead acid batteries for solar are valve regulated lead acid batteries (VRLA) meaning they come sealed so gases from the reactions cannot escape.

What makes a good solar battery?

To overcome these shortcomings, the best solar batteries are made with what is called the deep cycle technology. Deep cycle technology allows a solar battery to be discharged slowly over a long period of time until it has nothing left to give and then recharge and be ready for use again.
