

Who is responsible for space travel in Belarus?

It is closely associated with the National Academy of Sciences of Belarus, which was responsible for Belarusian space travel until the foundation of the Belarus Space Agency. On May 21, 2015, the agency remained as part of the National Academy of Sciences of Belarus but changed its name to National Agency for Space Researches.

Will Belarus use Russian-Belarusian ERS satellites?

This MCC will enable the country to make fuller use of a prospective group of Russian-Belarusian ERS satellites. Belarus, in partnership with Roscosmos, is developing a new high-resolution ERS satellite, the so-called "flying telescope", which will be placed into orbit in 2015.

Who has travelled to space in Belarus?

On May 21, 2015, the agency remained as part of the National Academy of Sciences of Belarus but changed its name to National Agency for Space Researches. The only Belarusians who have travelled to space are Pyotr Klimuk, Vladimir Kovalyonok, Oleg Novitsky, and Marina Vasilevskaya.

Why is Belarus building a mission control station?

Belarus commenced the construction of a mission control station (MCC) as part of its long-term space program aimed at expanding cooperation with Roscosmos. This MCC will enable the country to make fuller use of a prospective group of Russian-Belarusian ERS satellites.

What is space based solar power (SBSP)?

[...] With a commitment to investing £7.3 billion to early-stage energy projects and leveraging private investment through the National Wealth Fund, Space Based Solar Power (SBSP) aligns perfectly to achieving the new Labour government's mission driven green ambitions.

Will a space-based solar power plant power a kettle?

Whose kettles will be powered by the \$800 million satellite hasn't been decided but the plan is to launch the first orbital power plant by 2030. If the idea takes off, by 2036, the partners envision a fleet of six space-based solar power stations that could power up homes in Canada and northern Japan.

Space Solar has a single corporate priority. To develop Space-Based Solar Power for the benefit of our stakeholders and the world. Our work will support the transition to Net Zero and provide global energy security, delivering a safe and ...
