Algihaz, in partnership with BGL Energy (formally BElectric Gulf), is proud to have been part of the team delivering the Layla, a 10MW capacity solar photovoltaic plant, located in the province of Al-Aflaj, 200 Km south of Riyadh in Saudi Arabia.

Lesotho: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

BGL Energy specializes in the turn-key delivery of utility, commercial, and industrial scale solar power photovoltaic plants and energy storage systems within the renewable energy sector. The company offers a range of services including project development, design, construction, and long-term operation and maintenance for solar energy solutions

We want to be the preferred energy solutions partner for all commercial and industrial customers. We have a relentless focus on adding value to our customers' businesses by understanding and meeting their needs. Working closely with customers, from agriculture to mines, we tailor our energy solutions to their specific needs.

Energy Imports Net (% of energy use): It is estimated as energy use less production, both measured in oil equivalents. A negative value indicates that the country is a net exporter. Energy use refers to use of primary energy before transformation to other end-use fuels, which is equal to indigenous production plus imports and stock changes, minus exports and fuels supplied to ...
