

How much power does Bolivia produce a year?

Bolivia had an estimated installed generating capacity of 1,365 MW in 2012 and produced an estimated 7.375 billion kWh in 2013. Hydroelectric power plants with a nameplate capacity > 20 MW. Thermal power plants with a nameplate capacity > 80 MW. Bulobulo was built by a joint venture of NRG Energy, Vattenfall, and Pan American Energy LLC.

How much power will Bolivia have in 2025?

The government envisions a major expansion of electricity generation capacity to over 8,000 MW over the decade from 2015 to 2025, primarily to export surplus generating capacity. [6] In Bolivia, the National Interconnected System (SIN) connects major population centers and represents 83% of the installed capacity.

Did Bolivia have a power grid?

During that time, Bolivia had one of the longest power transmission grids in South America with a length of several hundred kilometers, though it is unknown if these power schemes were connected before creation of the national grid in 1965. Electrification supplied larger cities and the mining sector, while rural areas were mostly neglected.

Does Bolivia have a monopoly?

As for distribution, the six existing companies enjoy a geographic monopoly in their concession areas. The largest company is Electropaz, which is majority-owned by Spain's Iberdrola. In May 2010 president Evo Morales nationalized 80% of Bolivian generation by capacity, in his Government's attempt to regain ownership of public service companies.

Is ISA Bolivia a subsidiary of Interconexión Eléctrica?

ISA Bolivia, which runs 587 km, or 16%, of the transmission network in Bolivia, is a subsidiary of Interconexión Eléctrica S.A. (ISA), a corporation controlled by the government of Colombia. [15] San Cristóbal TESA has 172 km of transmission lines, or 5%.
