

Should Bosnia and Herzegovina use more energy?

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.

How much heat energy will Bosnia and Herzegovina produce in 2020?

The planned trajectory for the heating and cooling sector in Bosnia and Herzegovina shows that production of heat energy from RES in 2020 would be 1085.2 ktoe, which represents an increase in production of renewable heat energy by 279.4 ktoe compared to the baseline year.

Which sector produces res energy in Bosnia and Herzegovina?

Production of RES energy in Bosnia and Herzegovina is dominated by the heating and cooling sector, for which an increase from the baseline 867.2 ktoe to 1085.2 ktoe in 2020 was planned. In addition, the share of electric energy sector in production of RES energy in the planned period increases from the baseline 444.2 ktoe to 760.6 ktoe in 2020.

Should Bosnia & Herzegovina cap energy consumption?

To boost energy efficiency and energy savings, it also needs to cap primary energy consumption at 6.5 Mtoe and final energy consumption at 4.34 Mtoe by 2030. In mid-2023 Bosnia and Herzegovina published a draft National Energy and Climate Plan.

Is Bosnia and Herzegovina a net exporter of electricity?

Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity - the only one in the Western Balkans. More than half of its electricity generation capacity is made up of hydropower, while the remainder is made up of five lignite power plants.

Does Bosnia & Herzegovina use natural gas?

Bosnia and Herzegovina does not have its own natural gas extraction so it is dependent on the Beregovo - Horgos - Zvornik import route from Russia via Ukraine, Hungary and Serbia. Gas use in the country is limited by the distribution network which is only present in Sarajevo, Zenica, Zvornik and Visoko.

With the development of agricultural production, the demand for electricity correspondingly increases. To sustainably meet this demand, renewable energy sources (RESs) can be utilized.
