With a battery storage solution, you're harvesting the power you generate. ... Our product brochure contains the full GivEnergy commercial range. Plus, it's packed with handy info on the installation and support process. Download > 01377 252 874. support@givenergy .uk. ...

GivEnergy users were able to make money from excess energy stored in their GivEnergy batteries by exporting it back to the grid during times of peak demand. In total, GivEnergy battery owners delivered more than 60,000kWh to the grid over winter, earning a total of £138,000 for doing so. This was the largest automated participation in DFS!

However, GivEnergy's battery is significantly cheaper than Sonnen eco. Overall, GivEnergy's battery is a good option for those who want a reliable and affordable home energy storage system. While it may not have the same capacity as some of the more popular brands, it offers a great balance between price and performance. Conclusion

Before an event, we'll make sure your battery is fully topped up; During an event, your house will run from the battery, and any excess energy will be exported back to the grid; You'll get paid per kWh that you support the grid. The price will vary, up to £2.10/kWh

With GivEnergy installations, a ballpark cost of adding a solar battery for a 3-bedroom house would start at around £4,500. Again, we stress that this figure will vary depending on specific circumstances. To ensure you get the most out of you solar panels, it's important you properly size your battery storage system.

Let's say your battery charges from the grid in the early hours of the morning. However, you're anticipating sunny weather later in the day. You want to leave capacity in your battery to take advantage of a big solar charge. So, you limit your battery to charge to 75%, leaving you at least 25% capacity for solar.
