Botswana eyes 8,000 MW renewable energy boom Botswana is positioning itself to become Africa's solar energy powerhouse, with ambitions to produce over 8,000 megawatts of power for export, according to Vice President Ndaba Gaolathe. According to Gaolathe, the country has the potential to generate over 8,000 megawatts of power, which will be

MasTec is a leading provider of solar energy facility construction and power-system integration services for government, corporate, and residential clients across the country. We design, build, expand, and maintain efficient, cost-effective solar energy facilities from the ground up, helping our clients meet growing needs for clean, sustainable power and ongoing energy conservation.

Botswana is rich in natural resources and has vast solar energy potential, receiving over 3,200 hours of sunshine per year. Even though Botswana possesses vast coal resources, the nation's ambitions to drive a renewable energy transformation is clear to see. The country's Vision 2036 calls for 50% renewable energy allocation by 2036.
