

weather tower. On 2 April 1964, the Royal Navy's Antarctic ice vessel HMS Protector was sent to the island to investigate a new area of the land created by lava flow ten years prior to the expedition. Lieutenant Commander Allan Crawford and his team ...

MGT/Vaviri Partnership Update Reflecting on the journey of Vaviri with MGT, considering we began with a 12-year-old functioning prototype boasting efficiencies matching the latest water heating figures, we could not have anticipated the numerous challenges encountered in bringing the initial four finished and certified products to the market.
