

The small island of Bouvet is located about 1,750 km north of Antarctica and its location and topography make it the most remote, mysterious and inaccessible island in the world. With these premises, you can already imagine the adventure of getting there.

This map of Bouvet Island is provided by Google Maps, whose primary purpose is to provide local street maps rather than a planetary view of the Earth. Within the context of local street searches, angles and compass directions are very important, as well as ensuring that distances in all directions are shown at the same scale. ...

If you want to get away to get away from it all, forget the Caribbean, the South Pacific, or even the South Pole. We've got a place that beats them all: Bouvet Island, a small outcropping of rock and ice in the Southern Ocean. The nearest land is more than a thousand miles away, making Bouvet the most remote island on the planet. A French sailor named ...

Wysp? Bouveta odkry? 1 stycznia 1739 francuski ?eglarz i odkrywca Jean-Baptiste Charles Bouvet de Lozier, który dowodzi? francuskimi statkami Aigle i Marie. Jednak po?o?enie wyspy nie zosta?o dok?adnie ustalone, poniewa? Bouvet nie op?yn?? wyspy i pozosta?o niejasnym, czy by?a to na pewno wyspa, czy cz??? kontynentu.
