

8. Continuing the discussion of the potential drawbacks and considerations of widespread solar adoption in the British Virgin Islands (BVI), it's essential to address how this transition might impact the BVI Electricity ...

From its initial start as private/public autonomous and individual producers of electricity, the government owned public electricity supply was established in the 1950's. At that time, the BVI's main source of electricity was produced by one 20 KW generator, which provided six hours of service per day and supplied 63 consumers between Government house and...

If you do not need the solar system to power all your home appliances temporarily, it is also a smart choice to consider using solar AC units. It will save on your electricity bill. Air conditioning seems to have become a necessity for modern households, accounting for 20%-30% of the total electricity bill. In summer or winter, you can use air conditioning to keep your home comfortable.
