A whole-house generator, or standby generator, functions by providing automatic backup power to an entire home during power outages. It's integrated into your home's electrical system and usually runs on natural gas or propane. When the generator detects a power disruption, it activates automatically.

Construction has started on a solar plus storage project on the island of Anegada in the British Virgin Islands for a November 2023 commissioning date. The announcement by the Government of the Virgin Islands on 29 December, 2022, said the project combining solar PV and a battery energy storage system has a combined capacity of 2.1MW.
