

At Log One's new facility in Brnik, Slovenia, we've optimized the expansive roof for space efficiency and energy conservation. Our installation of a solar power plant with a capacity of 1,716 kWp is projected to yield approximately 1,708.7 MWh of energy annually.

Prapretno is the first solar power plant project in Slovenia above 1 MW in size to obtain a construction permit. Existing photovoltaic systems in Slovenia are all under 1 MW. The Prapretno project will have an estimated annual output of 3.4 GW, matching the electricity needs of 800 average households in the country.

Today at noon we officially opened our newest facility, the Prapretno Solar Power Plant, which at three megawatts of power is currently the largest solar power plant in Slovenia. The Prapretno Solar Power Plant was inaugurated in a ribbon-cutting ceremony by the Prime Minister of the Republic of Slovenia Janez Janša, HSE Director General ...

HESS plans to add a 6 MW photovoltaic unit to its Brežice hydroelectric plant, located on the lower part of the Sava river in Slovenia, which would make it a hybrid power production system. The solar unit would be the biggest of its kind ...

HSE said it is in possession of a building permit for a 3.04 MW solar power plant in Slovenia; The project will be located near Hrastnik, on the closed part of Prapretno pri Hrastniku non-hazardous waste landfill

1. When is a solar power plant considered movable property and when immovable property? To begin with, we can ask ourselves the basic question of whether and under what conditions a solar power plant is subject to property rights as an individual movable object, or under what conditions it is an element of the immovable property on which it is installed.

Prapretno is the first solar power plant project in Slovenia above 1 MW in size to obtain a construction permit. Existing photovoltaic systems in Slovenia are all under 1 MW. The Prapretno project will have an estimated ...

At present, solar energy accounts for about 5.8 percent of all electricity produced in Slovenia. The country will hold a referendum later this year on whether to build a new nuclear power plant in order to ensure a stable energy source in the future. The nuclear power plant NEK located in Slovenia is co-owned with Croatia.

In the last decade, solar power capacity has grown tremendously to become the fastest-growing source of renewable energy in the world. Solar power directly contributes to the Slovenia's energy security and independence, as well as helping to meet rising electricity demand and CO2 emission reduction goals.

Slovenia's GEN-I is launching construction on its first large-scale photovoltaic (PV) power plant, after

gaining rights to develop 17 MW of capacity on state owned land in North Macedonia. The project marks the company's expansion ...

Slovenia's GEN-I is launching construction on its first large-scale photovoltaic (PV) power plant, after gaining rights to develop 17 MW of capacity on state owned land in North Macedonia. The project marks the company's expansion into renewable energy generation.

Slovenia offers great potential for exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power ...

Slovenia, Kozina: Close to the Slovenian-Italian border, not far from Trieste, PV-Invest GmbH is building the largest solar power plant in Slovenia. With an impressive total output of seven megawatt peak (MWp), the plant in the village of Kozina will be connected to the grid this summer.

After a successful pilot project - the first self-sufficient energy community in Slovenia - GEN-I now plans to equip five more public buildings in Ajdov??ina with solar panels by the end of 2023, to will be available to all ...

Architect: OFIS architects Name of Project: Solar power offices Location: Ljubljana, Slovenia Date: 2010 Area: 32.500m² Type: Offices/Services Project team: Rok Oman, Spela Videcnik, Janez Martin?i?, Katja Aljaz, Janja del Linz, Andrej Gregori?, sergio silva santos, marco mazzotta, grzegorz ostrowski Software used: AutoCAD & 3dS Max It was measured ...

The Hrastnik municipality, part of a coal region undergoing economic transformation, now hosts the largest solar power plant in Slovenia, built by HSE, and another similar project is underway. Furthermore, the local authority just gave the green light for the foundation of an energy community that is planning to install the biggest citizen ...
