

Is Bulgaria getting more solar power?

Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power. Solar energy production has surged from one gigawatt (GWh) in 2019 to more than three GWh today, with solar accounting for nearly half of the country's electric capacity from renewables.

How big is Bulgaria's solar power market?

This is a large market with rapidly increasing purchasing power. For the first time after a decade, a 58 MW new large-scale solar photovoltaic power plant of the Bulgarian company Real States was connected to the grid in April 2022, with the expectation to be increased to 150 MW.

Does Bulgaria have a good energy sector?

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power.

Is solar PV a good investment in Bulgaria?

It is now economic for commercial and industrial customers in Bulgaria to invest in solar PV projects, without subsidies and without government incentives. As a result, the market for distributed solar PV in Bulgaria is starting to grow.

How much solar power does Bulgaria have in 2022?

At the end of 2022, Bulgaria's cumulative installed solar PV capacity exceeded 1,700 MW (1.7 GW). Several large-scale solar photovoltaic (PV) projects with a power capacity above 50 MW were launched into commercial operation in Bulgaria in 2022. Local and international investors will build new solar projects between 2023 and 2025.

Why is the market for distributed solar PV growing in Bulgaria?

As a result, the market for distributed solar PV in Bulgaria is starting to grow. Remarkably, the growth of the market is occurring despite the lack of a clear policy and regulatory framework, and in spite of the presence of many administrative and tax-related barriers.

A new factory for the production of solar panels will be built near the town of Omurtag (Bulgaria). The developer is the Bulgarian company Solar Panel EOOD, which will invest BGN 7.35 million in the project. The investment is expected to create 45 new jobs.

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as
