

Does Cape Verde have electricity?

Cape Verde has but one electricity company (Electra) and Cape Verde has one of the highest electricity prices in the world. Furthermore, the electric system is inefficient and registers energy losses of around 30%.

Will Electra be privatised in Cape Verde?

The Cape Verdean government has approved the privatisation process of Electra, an electricity and water company, involving the division into two companies, for production and distribution of electricity, and subsequent sale of up to 75% of the capital to strategic partners.

Should Electra be rebooted in Cape Verde?

Despite contributing to an above-average electrification rate of 95 per cent in Cape Verde, the state-owned electricity company Electra hasn't been as profitable as expected. The government wishes to reboot the company to take advantage of the country's immense potential in renewable energy.

Why does Cape Verde need CPCs?

Efficient electricity in Cape Verde is crucial to the tourism industry, the main driver of the national economy. Cape Verde officials call on CPCs to help them restructure and transfer the national electricity utility to the private sector.

Is Cape Verde a viable alternative to fossil fuels?

Solid waste can also represent an adequate option while ocean and geothermic energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renewable energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.
