

Who is Camlin energy?

And the third division is the aforementioned Camlin Energy; it is a global business outside of the UK focused on asset monitoring products for customers all over the world. "We bring to bear a wide range of technical capability, from switching, sensing, digital, communications, advanced analytics and much more," Cunningham adds.

What technical capabilities does Camlin energy offer?

"We bring to bear a wide range of technical capability, from switching, sensing, digital, communications, advanced analytics and much more," says Michael Cunningham, Managing Director, Camlin Energy.

Why should you choose Camlin Energy?

Camlin Energy offers greater reliability and resilience for energy networks. Discover how our monitoring solutions for transformers, rotating machines, and circuit breakers help energy operators to operate more efficiently, safely, and sustainably. These solutions deliver key insights into asset health, reducing the risk of unplanned outages.

What makes Camlin unique?

For a quarter of a century Camlin has been trusted as a world-leading provider of engineering solutions that enhance the performance of energy and transportation networks. When it comes to new thinking and incorporating new technologies, innovation is an ingrained part of the company's DNA.

Why is Camlin a sustainable company?

Camlin aims to achieve long-term profitable growth guided by balancing positive impact across people, planet and performance. The company is committed to obtaining net-zero emissions by or before 2050. With this aim in the works, Camlin has joined forces with UK partner 3Keel, that helps support Camlin's sustainability journey.

What is sapient by Camlin energy?

With its flexibility, scalability, and compatibility with existing enterprise platforms, Sapient by Camlin Energy is poised to set new standards in energy management, driving operational excellence and efficiency for energy operators worldwide. Camlin Energy's revolutionary Sapient suite is reshaping the energy landscape.

The Partial Discharge (PD) Triangle from Camlin Energy is a visual partial discharge monitoring tool which provides asset managers with a simple coloured visual image (PD Triangle) indicating the presence of active Partial Discharges, their intensity and the phase where the predominant phenomenon is occurring.

Camlin Energy, a leading innovator in the energy sector, announced the launch of Sapient, a groundbreaking

digital solution aimed at empowering energy operators to navigate the complexities of the grid.

Smart devices - collecting 24/7 fault and load information on thousands of LV circuits around the UK and transmitting this data back to our operations centre for analysis.. 24/7/365 technical support - with over a century of collective ...

Detect and diagnose transformer bushing problems at the earliest stage. Online monitoring of bushings, through monitoring of internal insulation (capacitance / Tan Delta or Power Factor) and the internal electrical activity (Partial discharges) enables asset managers to detect a fault at its very preliminary stage, allowing action to be taken before reaching a critical and irreversible ...

The Camlin Energy Dissolved Gas Analysis Matrix is a graphical tool to help obtain a clearer diagnosis of possible transformer faults from DGA data. The Dissolved Gas Analysis matrix shows all diagnostic methods in a graphical matrix with a simple color code.

Today he is Managing Director of Camlin Energy, a division of Camlin Group (Camlin), a company with a global presence and a direct heritage going back to 1978. Camlin exists with the sole purpose to optimise critical infrastructure that people, cities and communities around the world depend on, all day and every day.

Camlin Energy | 6,486 followers on LinkedIn. We partner with our customers to optimize asset performance and reduce exposure to commercial and reputational risks. | Optimizing Critical Infrastructures. Our smart solutions for electricity network faults and load management, monitoring and asset management enable electricity networks to run more smoothly, safely and sustainably.

Innovation at Camlin. Innovation has always been in Camlin's DNA. We're harnessing our cutting-edge data science and analytical capabilities to solve some of our customers' most pressing challenges. Discover how we're ...

Navigating the purchase of a new transformer can be daunting, considering that any risk begins before the asset is in service, at the point of specification and design. Limited expertise and experience further complicate the process for energy providers.

Today's energy networks are becoming more complex and challenging to manage, especially as utilities embark on the transition to renewable energy. Our intelligent solutions deliver data-driven insights that enable operators to monitor and protect their networks, optimize performance, reduce risk and secure greater commercial returns on their ...

Overview. Intermittent faults can be a major challenge for customers, often requiring an hour or more for operators to restore supply. Rezap Faultmaster is a multi-shot circuit breaker and auto-recloser that rapidly reconnects customers after intermittent LV cable faults, minimising interruptions while keeping staff safe.

Today's energy networks are becoming more complex and challenging to manage, especially as utilities embark on a transition to renewable energy. Our intelligent solutions deliver data-driven insights that enable operators to monitor and protect their networks, optimise performance, reduce risk and secure greater commercial returns on their ...

Camlin Energy has a strong track record of delivering technology that has changed the Energy industry. TOTUS is the only transformer monitoring solution that can detect arcing in a power transformer Dissolved Gas Analysis (DGA) is typically used to detect discharge of high energy (D2), with Acetylene being the primary marker.

Cookstown-born Cunningham, speaking exclusively to the Irish News, said that Camlin - which has a global presence at facilities in 21 cities across 17 countries - is working to optimise the ...

Camlin Energy's PROFILE P3 provides on-site Circuit Breaker Testing through "first trip" profiling. This enables condition-based maintenance to reduce operating costs and extend asset life. Preventing slow Circuit Breaker Trip: the ...

The Camlin Energy Dissolved Gas Analysis Matrix is a graphical tool to help obtain a clearer diagnosis of possible transformer faults from DGA data. The Dissolved Gas Analysis matrix shows all diagnostic methods in a graphical ...
