As a global automation leader, Emerson is poised to transform industrial manufacturing. Explore the next-generation automation architecture designed to break down data silos, liberate data and unleash the power of software with ...

Vertiv, formerly Emerson Network Power, designs, builds, and services mission critical technologies that enable vital applications for data centers, communication networks, and commercial & industrial environments We support today's growing mobile and cloud computing markets with our portfolio of power,

Emerson Network Power introduced Trellis(TM), the first integrated, single-information-source data center infrastructure management (DCIM) platform to bridge the critical gap between a data center's IT equipment and facilities infrastructure.. The Trellis dynamic infrastructure optimization platform is a family of hardware, software and services designed to ...

Le groupe international Emerson acquiert Chloride en septembre 2010 pour renforcer sa position en Europe et bénéficier de la technologie de pointe de Chloride. Emerson fusionne AEES et Chloride Industrial Systems pour créer Emerson Network Power Industrial System (ENPIS) avec une portée commerciale mondiale.

Emerson's Industrial Ethernet Switches are engineered to perform in harsh environments, including temperature extremes and high vibrations. Integrated into our Machine Edition environment, they're designed for reliability with redundant power inputs for higher availability and performance in demanding applications.

Emerson Network Power is now Artesyn Embedded Technologies. Emerson Network Power is a global leader in embedded in telecommunications and data network infrastructure. They deliver reliable power, precision cooling, connectivity, and embedded solutions for computer, communications, health care, and industrial systems.

Regardless of your size, you can't afford for your vital business systems to go down. At Emerson Network Power, we've built our capabilities on delivering reliable power, precision cooling, connectivity and embedded solutions that assure Business-Critical Continuity(TM) for your technology investments.. Our ability to keep your network infrastructure up and running, ...

S4K2U-C and S4K2U-5C Industrial On-Line UPS The SolaHD S4KC Series is a single phase, on-line (doubleconversion) UPS system available in 700-3000 VA, 120 V and 230 V. On-Line design means zero transfer time from external to internal power. When utility power fails, your critical load remains supported by a seamless flow of power.

Emerson Network Power has launched a new in-row cooling system for data centers, expanding its family of Liebert cooling products, which already includes a number of precision cooling solutions. The new Liebert CRV fits within a row of racks and blows cold air horizontally in both directions. The Liebert CRV is designed for a segregated hot aisle/cold ...
