

What are solar panel-clad car parks?

Solar panel-clad car parks represent a practical fusion of urban space and renewable power, transforming humble parking spaces into dynamic hubs of clean energy. And with the cost of solar panels decreasing by roughly 82% since 2010, it's easier than ever to implement these types of projects.

Why should you install a solar car park?

The key to a successful solar panel installation is ensuring that the system you choose will be able to produce the amount of electricity you need. You can generate free, clean electricity through a solar car park incorporated into your structure. This will save you a lot of money on your energy costs.

Should you cover your car park with solar panels?

Covering the parking lot with solar panels has a multipurpose function. Solar-powered car park shade structures are a terrific way to harness the power of the sun, help your company save money, and exhibit your dedication to sustainability.

Can you install solar panels on a car park roof?

It's a similar process to installing solar panels on sheds. Car park roofs are usually sizable areas that receive plenty of sunlight throughout the day, making them efficient locations for solar installations. The direct overhead location means they can also double as shades in uncovered car parks, protecting vehicles from harsh sunlight and heat.

Are solar panel-equipped car parks a reality?

In the UK, the vision of solar panel-equipped car parks is already a reality. Across the country, many car parks are getting an eco-friendly upgrade to harness the sun's energy right above our cars and vans. Let's explore some examples.

How much do solar panels cost in a car park?

We recently crunched the numbers and found the average cost of 10 panels was around £7,860. A covered multi-storey car park of 2,000 m², potentially needing around 500-700 panels, could cost between £393,000-£550,220. What are the benefits of putting solar panels on car park roofs? It's a similar process to installing solar panels on sheds.

The interior of a black car sitting in the sun in those temperatures can be 150 degrees. Shaded parking is a GODSEND. You'd be shocked how much extra gas your car guzzles down trying to power your AC after parking in the sun (>25% mileage reduction for short trips). Now couple that with the shade being provided by solar panels? Pure genius.

SCP provide a tailored solar car park design and installation service. We are a dedicated team who understand

the multifaceted DESIGN, PLANNING and INSTALLATION requirements involved with solar car park systems. The implementation of solar car parks requires an in-depth knowledge across a broad spectrum of disciplines ranging: Design consultation

Harness the power of the sun with our solar panel car parking shades, offering dual benefits of shade and clean energy generation.
