

Unusual and suspicious behaviour of a disgruntled employee captured in a 10 second surveillance video of a hypothetical nuclear facility opened a large-scale cybersecurity exercise in Slovenia. Following the employee footage, a series of simulated events unfolded and culminated in a malware attack at the hypothetical nuclear facility operational technology ...

The European Union aims to increase the share of renewable sources of energy in line with the European Green Deal requirements, with a particular focus on the transport sector. To meet the targets of the European Green Deal, the European Commission set various goals to drive the transition to carbon neutrality. Replacing fossil fuels with renewable source energy ...

Slovenia's only nuclear power plant began a preventive shutdown on Thursday because of a leak in the site's containment building, the operator said in a statement. "An increased leak in the primary system within the containment building was detected," officials at the Krsko plant, around 100 kilometres (60 miles) east of the capital Ljubljana, said in a statement ...

After eighteen months of safe and stable operation without shutdowns, a regular overhaul will take place at the Krsko Nuclear Power Plant (NPP) from October 1st to November 2nd. During the overhaul, in addition to changing part of the fuel, when 56 of the 121 fuel elements will be replaced, extensive maintenance work and some technological improvements ...

Lignite deposits are found in the north central and northeastern regions of Slovenia; [3] the country does not have any identified hard coal reserves. There is one active lignite mine in Slovenia, near Velenje in the north central region of the country. The mine produced 3.2 million tonnes of lignite in 2018 for combustion in the neighboring Krško Power Plant.

Central Energy AG is an independent, privately owned energy trading company with its head office in Zug, Switzerland. The company has been incorporated in 1997 and ever since has been engaged in trading and shipping of oil products. Recently, activities have been expanded to include biofuels and soft commodities.

The development and maintenance of nuclear infrastructure is important for achieving long-term goals in the energy sector. Nuclear technology promotes the development of science and education, which contributes to the development of highly qualified personnel in Slovenia vesting in nuclear technology and research allows Slovenia to keep up with ...

Renewable energy's effectiveness is hindered by its dependency on variable weather and geographic conditions, necessitating constant backup from other energy sources. Germany, for example, has had to reactivate coal plants due to the closing of nuclear facilities. Additionally, storing excess electricity from renewables is still undeveloped, costly, and energy-intensive, ...

The Litija Pb-Zn-Hg-(Ag) ore deposit, located in Central Slovenia, is named after the nearby city of Litija (historically known as Littai). The sulfide ore, associated with baryte veins, is hosted within Carboniferous clastic rocks and forms the small hill of Sitarjevec, which overlooks the city. ... equipped with an Oxford Instruments UltimMax ...

Slovenian Prime Minister has announced his support to the construction of a second nuclear reactor at the Krko Nuclear Power Plant (NEK), Slovenia's sole nuclear power plant, to replace the existing one beyond 2043. A new reactor would be needed to help sustain the countrys economic growth, facing increasing demand for electricity. By the time the ...
