The installation is part of GSL Energy's ongoing efforts to support clean, efficient ...

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

A new program in Puerto Rico could tap thousands of residential solar-plus-battery systems to help keep the island's grid from going dark during the height of hurricane season. Sunrun says it's planning to launch a first-of-its-kind initiative later this summer that will turn customers with rooftop solar panels and battery backup systems ...
