

Does Chile have a solar thermal tower?

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the pillars of the country's ambitious green energy program that began in 2019 and aims to completely replace fossil fuels by 2040.

How much solar energy does Chile need?

Chile's DNI is 3,800 kWh/m² in the Atacama desert, the world's highest solar resource for CSP projects. The region is not subject to sandstorms. Variable renewables, PV and wind, increasingly supply the grid, and to complement these renewables, flexible dispatchable generation, such as is provided by CSP with thermal energy storage, is needed.

Will Chile replace coal plants with solar thermal plants?

As coal plants are eliminated, Chile intends to replace them with solar thermal plants or convert them into batteries like the Alba Project. The solar thermal tower Cerro Dominador has become a symbol of Chile's energy revolution against climate change.

Is there an alternative to solar energy in Chile?

Chile has begun to explore an alternative. Both Cerro Dominador and the Alba Project are powered by so-called solar salts, extracted from the Atacama Desert, composed of potassium nitrate and sodium nitrate. When melted and kept in a liquid state, they allow energy to be stored.

How much of Chile's energy will come from Sun and wind?

"A decade ago, no one would have imagined that more than a third of Chile's energy would come from the sun and wind before 2030," the former Environment Minister of Chile Marcelo Mena says. "It was seen as something ambitious and it has already been surpassed."

Could Chilean manufacturing benefit from CSP?

A study assessing the benefits to Chilean manufacturing estimated that Chilean industries could supply between 18% and 56% of the parts needed for CSP overall and could supply most of the thermal energy storage between building the tanks and providing the molten salts.

President / CEO Sunflow Solar Structures Inc Todd Mitchell
Site Manager - Utility Scale Solar PV
