

Amid an onslaught of grim climate news, China's recent decision to pursue a faster green transition is a rare bright spot. In early March, at the annual National People's Congress, Premier Li Qiang announced that the country would accelerate investment in clean-energy projects. The plan is for a "new trio" of industries - solar panels, electric vehicles (EVs), ...

The China Energy Outlook (CEO) provides a detailed review of China's energy use and trends. China is the world's largest consumer and producer of primary energy as well as the world's largest emitter of energy-related carbon dioxide (CO 2) ina surpassed the U.S. in primary energy consumption in 2010 and in CO 2 emissions in 2006. In 2018, China was responsible ...

La batería viene en camino desde China. Erco Energy la pondrá en la granja La Martina que entrará en operación en marzo de 2025. Una de las críticas más frecuentes a los proyectos de energía solar ha sido su falta de confiabilidad. La razón es simple: solo producen electricidad cuando hay luz solar, lo que significa que [...]
