

What does Circor do?

CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications. On land and sea, in air and space, and under the ocean's surface, when failure is not an option, the most trusted name in critical fluid handling is CIRCOR. If it is flow control, it's here.

Why did Circor expand to Weihai?

to serve you faster! CIRCOR is extending its portfolio of products at the Weihai facility. This expansion will help us support our customers in the APAC market faster and smoother. CIRCOR is now closer to you than ever! You can continue to rely on the exceptional service and quick responsiveness that you are accustomed to from IMO AB.

Why should you choose Circor for a pump & valve system?

The stakes are high, the environments are demanding, and the consequences are catastrophic for those tasked with fluid handling in the world's toughest environments. CIRCOR delivers pump & valve systems and custom engineering & design services designed to address the most mission-critical and severe-service applications.

Why should you choose Circor?

CIRCOR is a hub for comprehensive flow control solutions engineered to meet the highest standards for the most demanding applications. PRODUCT FINDER We're ready to put our industry-tailored experience and solutions to work for you. Trusted brands to solve your toughest problems.

Why should you choose Circor AB?

CIRCOR is now closer to you than ever! You can continue to rely on the exceptional service and quick responsiveness that you are accustomed to from IMO AB. Look through our Weihai facility to explore our portfolio of established flow control technologies, custom engineering & design, and technical support that work for you.

Why should you choose Circor Zenith Pumps?

CIRCOR's Zenith Pumps helps customer roll out a revolutionary new way of making scented plastic bags. Many roles. One purpose. Keeping society safe, productive and moving. When failure is not an option. Turn to the most trusted name in critical fluid handling. Excellence in flow control. Achieving excellence through technology, teamwork and talent.

CIRCOR International is a leading supplier of pump solutions for a wide range of industries - from general industry to the energy sector and the navy to the marine and oil and gas industries. ... China. Phone +86 631 5977 900. See on map ...

Houttuin, a CIRCOR brand, developed the original pump design that became the blueprint for today's low-pressure, twin-screw positive displacement rotary pumps. These pumps, initially built in 1929 for the Dutch coal industry, solidified our reputation for manufacturing high-quality, energy-efficient and cost-effective industrial pumps.

CIRCOR three screw pumps from IMO incorporate a positive displacement rotary design consisting of a housing, which envelops the drive screw (power rotor) and the sealing screws (idler rotors). The intermeshing of the threads of these rotors, along with the close fit of the surrounding housing, creates a moving labyrinth seal, which captures the ...

CIRCOR offers a broad range of flow control products for the oil and gas, aerospace, defense, power generation, commercial and institutional, maritime, and general industries. From ball valves to control valves, we cover the entire range with products manufactured to the highest standards to perform in the most demanding conditions.

CIRCOR developed a solution which resolved Alfa Laval's latency issues while building capacity on our side, demonstrating yet again that CIRCOR is more than just manufacturer and supplier of world class fluid handling equipment; CIRCOR is an amenable business partner with the very best interests of its clients at heart.

CIRCOR offers an innovative portfolio of pump and valve technologies from brands you know and trust. Our engineering and design specialists conduct extensive research and testing to develop the highest quality products that meet all international standards. Our application and technology expertise allows us to safely and effectively manage the ...

Hydroseal Series 3500 Pilot Operated Relief Valve3 Hydroseal Series 3500 Operation, Snap & Modulating Action Snap Action Pilot Below Set Pressure:The pilot allows the inlet pressure to pass through and charge the dome of the main valve keeping

Circor is a world-renowned brand in filtration and separation technology, integrating engineering consulting, design, manufacture, sales and technical services with the broadest product portfolio. ... electric power, water ...

Circor Energy. US-based Circor Energy is one of the leading designers and manufacturers of highly engineered products and sub-systems. The company caters to numerous industries such as oil and gas, industrial, aerospace, defense, power generation, commercial & institutional facilities, and marine industry segments. ...
