Dutch technology & innovation in green energy. While the Netherlands doesn't have much to be proud of in terms of carbon emissions, the country does run the show when it comes to innovation and technology.For one, the Netherlands is a global leader in the deployment of electric vehicles, according to the International Energy Agency.. READ MORE | Setting up ...

On the road to a carbon-neutral energy system in 2035, ambitious targets are set by the Dutch government for both energy production (3GW offshore solar and 21GW of offshore wind by 2030) as well as energy carriers such as hydrogen (4GW by 2030). Perhaps even more ambitious are the underlying policy frameworks.

From increasing taxes to new policies, this is how energy prices in the Netherlands are changing next year. The Netherlands is getting rid of the price ceiling. At the start of 2023, the Dutch government introduced a price ceiling for gas and electricity meant to protect households from price fluctuations, reports the NOS.

Comtec Energy Limited | 329 followers on LinkedIn. Comtec Energy is an emerging designer, system integrator and solution provider of Solar energy systems and applications.
