

How much solar power can Costa Rica use?

Utilising about 6% of total solar power potential and 25% of Costa Rica's wind power potential would suffice to supply enough energy to do so. Electricity costs can be reduced by almost US\$1 cent per kWh of power generation by deployment utility-scale and decentralised renewable energy installations.

Is solar power a new energy source in Costa Rica?

Like wind power, solar power is another newer energy source in the country. The first solar power projects in the country were established in 1978 by just a few researchers from public universities at the Solar Power Laboratory at the National University. During 2012, Costa Rica inaugurated the Miravalles Solar Plant next to the Miravalles Volcano.
