

Who regulates energy activities in Croatia?

Croatian Energy Regulatory Agency (HERA) is an autonomous, independent and non-profit public institution which regulates energy activities in the Republic of Croatia. HERA's obligations, authorities and responsibilities are based on the Act on the Regulation of Energy Activities, the Energy Act and other acts regulating specific energy activities.

How is electricity supplied in Croatia?

Customers in Croatia are supplied with electricity from power plants in Croatia, from power plants built in neighboring countries for Croatia's needs and with electricity procured from abroad. By its size, the Croatian power system is one of the smallest power systems in Europe.

How is energy used in Croatia?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How can Croatia improve energy security?

In order to strengthen energy security and reduce energy imports from third countries, Croatia is exploring the possibility to increase the production of domestic hydrocarbon resources. At the same time, Croatia also has plans to diversify natural gas supply routes by constructing an LNG terminal on the island of Krk.

What percentage of Croatia's energy mix is renewable?

Renewable energies account for approximately 31.33% of Croatia's energy mix. Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity.

What is Croatia's solar energy potential?

"Croatia's solar energy potential estimated at 6.8 GW"; Balkan Green Energy News. Retrieved 18 March 2022. ^Spasi?, Vladimir (10 November 2021). "Croatia to add 1.5 GW of renewables by 2025"; Balkan Green Energy News. Retrieved 18 March 2022.

Concessions for the development of thermal energy distribution systems and distribution of thermal energy; Participation in decision-making on location and construction of new power plants, energy networks, and other facilities; Optional establishment of regional energy agencies (in cooperation with other local authorities).

proportion of Croatia's economy. Firms in energy industries employ several thousand people directly, out of a total of 1.1 million jobs in Croatia's economy. Energy-related manufacturing firms produce EUR 2 billion of output, which is 3.9 percent of all private sector activity in Croatia. The energy sector in Croatia consists of 1,000

Today's electrical energy landscape is characterized by new challenges such as deregulation, liberalization of energy markets, increased competition, growing demands on security of supply, price insecurities, and demand to cut CO2 emissions. All mentioned challenges are calling for consideration of various options (like nuclear, coal, gas or renewable scenarios) and for better ...

is identified in one of the following intervention fields (i.e. 029 - Renewable energy: solar; 032 - Other renewable energy (including geothermal energy); 033 - Smart Energy Systems (including smart grids and ICT systems) and related storage.) this amount was deducted from the respective categories (i.e. renewables and grids).

While there are some similarities, Croatia's system is less in need of an overall heating sector overhaul due to climate conditions, however it is comparable in the areas of grid regulation. A more correct comparison to the view taken by the authors is in the work Mathiesen [29], especially with the proposal on smart energy systems in the ...

1. Introduction. Today it is important more than ever to take sustainable path in designing future energy systems. In December 2015 at the 21 st UN Conference of the Parties (COP21) global agreement to keep the rise in global mean temperature below 2 °C was achieved. It is clear that energy sector will play critical role in reduction of greenhouse gas (GHG) ...

15 Energy law in Croatia is governed by a series of laws and regulations designed to ensure energy security, promote renewable sources, and support environmental protection. ...
