

Will Cuba's energy investment strengthen the national energy system?

This investment is expected to significantly strengthen the national energy system. Since October, Cuba has experienced total paralysis of the national energy system three times, caused by a failure at the main Antonio Guiteras power plant in Matanzas in the western part of the country.

What are Cuba's energy goals?

The Cuban government intends to reduce its reliance on crude oil by more than 10% and to increase the share of renewable energies for power generation, although the energy mix will still be quite reliant on fossil fuels. See Table 2 for a breakdown of the 2030 goals and a comparison to the 2014 data.

What will Cuba do about the energy crisis?

The Cuban government plans to invest significantly in photovoltaic parks and wind farms to address the severe energy crisis on the island for several months. The authorities in Havana also intend to support citizens in installing solar panels.

What type of energy is used in Cuba?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Cuba: How much of the country's energy comes from nuclear power?

How much electricity will Cuba generate in 2030?

In accordance with the 2030 projections given by the Ministry of Energy and Mines, in 2030 electricity generation in Cuba will be around 30,000 GWh per year. This represents a 57% growth in electricity generation. Substantial advancement is necessary if 24% of that (7,200 GWh) is to be generated by renewable sources.

What was the energy mix in Cuba in the 1990s?

In the 1990s, Cuba's energy mix was still dominated by fossil fuels, but at the beginning of that decade, almost 11% of the electricity was generated from renewable energy carriers, basically sugar cane waste. Electricity generation was severely affected by the drop of oil imports and loss of access to spare parts for the power plants.

IEC (Information Education and Communication) Cuba Welfare Society (CWS) established in 2019 to help in developing Clean and Healthy communities.
