Excellent Energy-Saving Device: The power saving box can provide ideal power saving effect for families with electrical appliances and loads, provide stable voltage and current, increase the power of electrical appliances, avoid the ineffective waste of electric energy, and prolong the service life of electrical products

However, if both subpanels had A/C units on them (1 for home and 1 for suite in back), you would get better savings installing 2 units to the subpanels instead of the main. Another rule of thumb is: Focus on where the large motors on the property are. The closer you install a power saver to the motor, the more kilowatt savings you will get.
