Democratic Republic of the Congo - Market Overview ... and uranium, as well as renewable energy sources, including hydroelectric, biomass, solar, and geothermal power. Hydroelectric power accounts for 96 percent of domestic power ...

As part of its plans to connect over 25MW of wind and solar energy initiatives to the grid this year, TGC Renewables has begun construction on one of the largest solar projects in the UK. The 3.6MW project, comprising 14,700 PV panels, will be installed over three adjacent fields on a 8.32 hectare site, north of the village of Clawton, Devon.

This is the largest site TGC Renewables has developed so far. The company says it has about 10 MW in operation or under construction and aimed to take the figure to more than 100 MW in a year and a half. It plans to connect to the grid more than 25 MW of wind and solar projects in 2012. Sector. Solar Power. Region/Country: UK.

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings.
