

Why is Denmark so energy efficient?

Denmark is one of the most energy-efficient countries in the world. The widespread use of district heating and combined heat and power is one of the primary reasons that energy efficiency has increased while carbon emissions have decreased in Denmark over the past several decades.

Should Denmark prepare a green infrastructure master plan?

The IEA report also recommends preparing a green infrastructure master plan at the regional level, as Denmark assumes the Presidency of the North Sea Energy Cooperation in 2024. Such a plan would help to lower cost and de-risk investment. This includes power grids, CO₂ and hydrogen networks.

How many PCT of Danish households are connected to district heating?

Today, around 64 pct. of all private Danish households are connected to district heating utilized for space heating and hot water combined. Denmark has six large central district-heating areas distributing a total heat production of approximately 67 petajoules (PJ) per year.

What can Denmark learn from the energy crisis?

Denmark can learn from the energy crisis with a view to prepare for the winter 2023-24, which will require a continuous focus on energy savings, renewables deployment, maximised energy production and the scaling up of clean energy investment. One lesson learnt is that demand-side flexibility can be enabled.

How long will Denmark be able to reduce emissions?

By the end of the decade, Denmark must achieve in seven years what it managed over the past 30 years in terms of emissions reductions. According to the new IEA energy policy review, additional measures will be needed most notably in the transport and buildings sectors.

Does Denmark have a reliance on fossil fuels?

The district heating sector has practically phased out coal, helping lower the reliance on fossil fuels in Denmark's total energy supply (TES) from 75% in 2011 to 53% in 2022, well below the IEA average of 79%. Denmark is committed to ending fossil fuel production by 2050.

Mepa Energy Systems | 4,699 followers on LinkedIn. You Can Depend On Me | Authorized Dealer of Cummins Power Generation, Distribution Europe for power generation sale, service and spare parts, MEPA Energy has taken an important role with high level experience in the energy field since 2000. We do serve with our multinational expert staff around the world.
