

The low price of the Smart Export Guarantee for domestic solar producers to export to the grid, (4.9p/kWh - just over 13% of the current wholesale price of 37.2p/kWh) means that there has been a boom in solar PV owners using battery storage to store their excess energy rather than selling it to the grid.

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines the best characteristics from both grid-tie and off-grid solar systems. In other words, a hybrid solar system generates power in the same way as a common grid-tie solar system but uses special hybrid inverters and batteries to store energy for later use. For this reason, ...
