Where is Drax Power Station?

Drax power station is an operating power station of at least 2676-megawatts (MW) in Drax, Selby, North Yorkshire, United Kingdom with multiple units, some of which are not currently operating. It is also known as UK Oxy CCS Demonstration Project (White Rose CCS Project). The map below shows the exact location of the power station. Loading map...

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for £1.87 billion (US\$3 billion).

Did Drax buy Opus Energy?

In 2016, Drax Group acquired Opus Energy for £340 million funded by a new acquisition debt facility of up to £375 million. In October 2017, Drax sold Billington Bioenergy for £2 million to an AIM-listed energy company called Aggregated Micro Power Holdings.

When did Drax Group acquire Haven Power & Billington Bioenergy?

In 2009, Drax Group acquired Haven Power - enabling it to sell electricity directly. In 2015, the Group acquired Billington Bioenergy, specialists in providing sustainable biomass pellets for domestic energy systems.

How many generating companies did Drax Power Station have?

Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies. Over the years that followed privatisation, the map of the industry changed dramatically.

Then, the amount of renewable power Drax was able to generate roughly doubled in the summer of 2010 when a 400 MW co-firing facility became operational. Back to the present day, it's fortunate for the Unit 4 conversion that the co-firing facility includes its own rail unloading building (RUB 1) and storage silos. They are located much closer ...
