A very concise explanation of how solar panels work is this : Solar panels absorb energy from the sun, creating direct current (DC) electricity. This electricity is fed into what is called a solar inverter, which in turn, converts the current into alternating current (AC) electricity which is then used to power electrical appliances.

Solar energy generation in El Salvador to generate 354 Kw, with the installation of 864 photovoltaic panels in a 3,500 square meter area.
