How many enepaq temperature sensors can a tiny BMS support?

It requires a pull-up resistor to operate at BMS 5 V output level. As already mentioned, Tiny BMS can support up to 16 Enepaq multipoint active temperature sensors per channel (in case that one sensor contains all 4 sensor nodes). It means that one BMS temperature channel is capable to measure altogether 64 temperature sensing nodes (hotspots).

What is tiny BMS?

Tiny BMS measures individual voltages of parallel cell groups and manages switching of load and charger. During charging, cells are balanced by bleeding-off higher cells to accomplish full balance and maintain good health of battery pack. State-of-Charge is calculated as well, and is available via communication bus to be displayed for user.

Orion offers only a centralized BMS to my knowledge. Energen themselves actually offer distributed BMS options, but I haven't used them or met anyone who has. The amount of work setting up an off-the-shelf BMS is probably 1 or 2 orders of ...
