

Alleviating energy poverty and attracting foreign investments alone is not enough in meeting the many challenges on the rocky road ahead to President Castro's restructuring of the electricity system. Instead it needs courageous structural reform of the system as a whole and the backing of proponents from inside the economy to make it sustainable.

Find detailed information about energy management systems, controllers and occupancy sensors companies Honduras for your Electrical and surveillance needs from our Electrical directory. Make sales enquiries or order product and service literature.

Roatan Electric Company (RECO) provides electric power service for the island of Roatan with generation through a modern and technological Clean Combustion plant based on LPG gas. The generation plant provides cleaner, more reliable ...

According to the IDB report: "Ironically, many of Honduras' new solar plants are linked to the same energy companies with whom (with support from the IDB) the Government successfully re-negotiated over-priced thermal generation contracts in 2014, including LUFUSSA, ENERSA and ELCOSA."

About GEO. GEO is a set of free interactive databases and tools built collaboratively by people like you. GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.
