In Australia yes. IQ7 does have auto-consumption system possibilities, good! Now IQ8 arrived, promising to function if the grid fails. I now may need to go off-grid in a new house, IQ7 is not an option without grid, but IQ8 should be? So, all in all: can I build a proper off-grid system now?

Enphase really dislikes off-grid, so initially you have to have a "grid" in order to initialize the system. Afterwards I have run it completely without a feed for months at a time, occasionally giving it a simulated "grid" for 30 or so minutes. What i ...

For installers in the United States commissioning Off-Grid only sites: Enphase Installer App now allows Off-Grid only commissioning . Installers will be allowed to commission Off-Grid Enphase Energy Systems. Installers are required to complete training to perform the wiring and commissioning of Off-Grid configurations.

Select the grid profile you want to set for the system, and then tap the Update Grid Profile button at the bottom of the screen. You can use the search box to find the grid profile you need.

Cheapest way to operate Enphase IQ7+ off-grid? I recently had an 8kW-peak solar system installed which uses the Enphase IQ7+ micro-inverters. While off-grid operation is not a necessarily a big consideration for me I didn't actually realize at the time these micro-inverters will simply stop working when there is a power-failure.

Hi @Ortiz_7543 . I believe you want operate your PV system in Off grid mode. If this is the case, then you may have to install Batteries and system controllers (But operating along with the grid by prioritizing the PV and Battery is the best mode of operation)
