

The patented Eris Methodology allows for the creation of a listed futures contract that replicates the cash flows, convexity and functionality of traditional over-the-counter swaps. As listed contracts, Eris Swap Futures are available to a wider user base as transparent financial instruments for easy trading and long term hedging purposes.

[Intro] I just need you to tell me if you're vibin" I'm not one for wildin" And I don't need no bad energy

Mexico: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Given the fundamentals of the US interconnection service structure, Norris thinks a wholesale shift to an ERIS/energy-only model outside ERCOT is unlikely. In any case, he also believes characterising the debate over interconnection reform as "ERCOT versus non-ERCOT" is overly simplistic, highlighting opportunities for other jurisdictions ...
