

Do ESS units need a fire suppression system?

When outdoors, ESS are typically in modular (i.e. containerized) units. Both NFPA 855 and DS 5-33 require that modules be provided with separation: A fire detection and fire control and suppression system is generally required by both NFPA 855 and DS 5-33 and automatic sprinkler protection is the preferred method.

Can a sprinkler extinguish an ESS fire?

One paragraph that jumps out at me--&quot;Full-scale tests have shown that sprinklers are unable to outright extinguish an ESS fire. However, sprinklers provide ample cooling of both the batteries and the surrounding occupancy.

Did the fire department know about the ESS explosion?

This is an important lesson learned from the 2019 ESS explosion in Surprise, AZ where four members of the fire service were severely injured. The fire department leadership later testified that the fire department did not know about the ESS beforehand.

New terms have been added to the fire protection vocabulary: thermal runaway, off-gassing, electrolyte, ESS, and battery management system. Hiller has been closely involved in creating the new NFPA 855 standard. Hiller has been ...
