The Eswatini Energy Regulatory Authority (Esera) has published the results of a tender for the construction of

new solar power plants. The government body has selected the Globeleq-Sturdee Energy consortium ...

The Eswatini Energy Regulatory Authority (ESERA) has confirmed that the construction of projects in line with the 75MW Solar PV generating capacities will begin at the end of 2024. This follows announcement last month by ESERA of its intention to award contracts to preferred bidders for 75MW Solar PV generation capacities in line with Section ...

Edwaleni Solar Power Station, is a 100 megawatts solar power plant under construction in Eswatini. The solar farm is under development by Frazium Energy, a subsidiary of the Frazer Solar Group, an Australian-German conglomerate. The solar component is complemented by a battery energy storage system, expected to be the largest in Africa. The energy off-taker is Eswatini ...

Solar Panels. Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar panels in residential and commercial buildings to provide both electricity and water heating. ... Eswatini offers numerous foreign business incentives ...

Eswatini, a small landlocked country in Southern Africa, offers diverse business opportunities. With a stable political environment, the government encourages foreign investment through initiatives like the Eswatini Investment Promotion Authority (EIPA). Understanding the local culture and regulatory framework is crucial for successful business ventures in Eswatini. Here some of ...

We strive to be in communication with our customers until the job is done. Please use the form for an estimate, or call us for any questions about converting your home or business to solar. We look forward to serving you!

Explore the solar photovoltaic (PV) potential across 2 locations in Eswatini, from Mbabane to Manzini. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.
