

What is everforce energy?

EverForce Energy is a leader in new energy innovation changing the paradigm of electrical energy generation and energy efficiency. EverForce has developed the magnetic transducer generator and solar power booster. Several other product development projects are also under way.

What is magnetic transducer generator everforce energy?

The Magnetic Transducer Generator EverForce Energy focus is the deployment and distribution of the MTG technology, a technology that will redefine the electrical energy generation sector.

What is everforce solar power booster?

EverForce Solar Power Booster is designed to increase the output of a Photovoltaic (PV) panel by an average of 45%, thus significantly increasing the overall output of a PV system, and ROI (return of investment) on PV installations. Innovative clean energy Advanced Zero-emissions Energy

At Eversource, Energy Brings Us Together. We live in the neighborhoods we serve, working for a better tomorrow. We're nearly 10,000 people committed to providing safe, reliable and sustainable electric, gas and water service in Massachusetts, Connecticut and New Hampshire. Our operations trace their roots back to the middle of the 19th century. ...

Eversource (NYSE: ES) has been awarded the "New York Project of the Year" from the Engineering News-Record (ENR) for its leading efforts building the onshore infrastructure for the South Fork Wind project, the first commercial scale offshore wind project in the United States.. This award underscores Eversource's instrumental role and experience in building ...

New England's largest energy utility, Eversource, has parted ways with the American Gas Association -- a powerful industry group that environmentalists say has been instrumental in blocking ...

Hitachi Energy has announced that they will install the world's first eco-efficient EconiQ(TM) 420-kilovolt (kV) circuit-breaker for Eversource in the US. This technology eliminates sulfur hexafluoride (SF6), so it will be the first ...

Eversource Energy is a utility holding company, which is engaged in the energy delivery business through its subsidiaries. Its segments include Electric Distribution, Electric Transmission, Natural Gas Distribution and Water Distribution.

The Magnetic Transducer Generator is a low-cost, non-polluting, and easily accessible way of generating electrical energy. That can be used in both large or small scale energy areas. The main purpose is to create an efficient and environmentally friendly and sustainable power generator and provide a new source of energy for
