

Is French energy transition a common ground for stronger energy cooperation?

This French energy transition paradigm (transition énergétique) is serving as a common ground for stronger energy cooperation with Germany. The French-German relationship is indeed a singular one, and this is no less true for energy policy!

Why do French power systems rely on imports?

All sce-narios rely on electricity imports, which play a critical role for the reliability of the French power system (in the different scenarios, about 8-10 GW of the winter peak demand is covered by imports).

How concentrated is the French power market?

The French power market remains highly concentrated and, although increasing, wholesale market liquidity is low compared with its neighbours. Wholesale market concentration in terms of production as measured by RTE 2014c.

When used as part of a combined heat and power system (CHP), you receive the highest efficiency from your system. ... Need help finding the perfect product or system? No problem at all.
