

Who is Freyr battery?

FREYR Battery is transforming into a vertically integrated solar module/cell and battery energy storage systems leader through the acquisition of Trina Solar's US assets.

Where is Freyr based?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in the United States and Vaasa, Finland. FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030.

Is Freyr a semi-solid state battery company?

FREYR Battery, Inc. (NYSE: FREY) is a pre-production semi-solid state tech battery company. Or at least it was.

When will Freyr charge its first battery unit cells?

FREYR has assembled and successfully charged its first battery unit cells at the company's Customer Qualification Plant ("CQP") and is on schedule to ramp process automation, production, and testing of chargeable cells in H2 2023 and beyond.

What does Freyr's final investment decision mean for the battery industry?

The semi-automated assembly of the first unit cells is the first major post-opening achievement at the CQP less than two years after FREYR announced its Final Investment Decision ("FID") of the giga scale nameplate plant. The Norwegian Government is expected to outline a battery industry support package later this week.

How much battery capacity does Freyr plan to install in 2025?

FREYR intends to install 50 GWh of battery cell capacity by 2025 and 100 GWh annual capacity by 2028 and 200 GWh of annual capacity by 2030. To learn more about FREYR, please visit [Cautionary Statement Concerning Forward-Looking Statements](#)
